Windows Patches

1998-08-21 v1.1 patch (European releases only)

IMPORTANT NOTICES:

- THIS IS PATCH FOR ONLY THE EUROPEAN VERSIONS, NORTH AMERICAN USERS DO NOT NEED TO RUN THIS PATCH (North American version CD art shows Tiny taking out a guard)
- This text is English only. I was not able to translate into the other languages.
- For European Versions, there will be TWO patches. This patch is a BUG FIX PATCH. The 1.1 feature update patch is coming early September. I will be available on our European Eidos websites. That patch will add new features (it will be large in file size)

TO INSTALL, DOUBLE CLICK ON THE CBEL_EUROPE.EXE file.

If you receive an install error message, it may be caused by the installer not locating your installed game (reinstall to default directory and then update) OR your version is the current version or a demo.

Version 1.0 Bug Fixes

- Save/Load Bug fixed
- Commando random movement after Quick Load fixed
- When Quick Save is loaded, camera starts in same position it was in when game was saved
- Video resolution now saved upon exit
- Removal of "Mother Nature" ambient audio feature
- The last user to play the game will have their saved games listed as the default upon restart
- If you are unable to finish the mission because a Commando died, a message will appear
- Spelling error in dedicated server
- Password removed from multiplayer game (passwords are not used)
- Commandos are no longer able to get in Fins backpack when raft is deflated.
- Last user profile is saved and loaded at game restart
- Harpoon Gun increase

NOTE: German soldiers can sometimes see commandos behind vehicles. This is often the case when commandos are at the corners of the vehicle. Stay in the center of the vehicle to avoid this.
