Reverse Engineering

Game *Commandos: Behind Enemy Lines*

Location Sysendam, Eidfjord, Norway

Date March 4, 1941

Briefing

Previous Mission A Quiet Blowup

Next Mission Restore Pride

Objectives Blow up the dam

Team Green Beret
Diver
Sapper
Spy

Enemies Regular soldiers

Historical Background

It's March, 1941. Repeated incursions in Norway must be organised in order to harass the occupation army and force Hitler to send troops to the zone, diverting them from the Mediterranean scenario. These incursions must meet minimum material means and maximum results.

Objectives

The objective of this operation is to demolish the large dam of Sysendam, near the Sima hydroelectric power plant, in Eidfjord. This way several important bridges will be knocked down and the whole area will be left without electric supply.

Tactical Advice

Officer, you are going to approach the area from the north... ...and demolish the dam with explosives placed in the base. You'll have to steal some powerful charges from inside the transformer station. Remember only your sapper can handle them. The perimeter of the station is electrified, but the fence circuit can be turned off with this control switch. The spy in your unit is able to impersonate any German commander. Just get him a German uniform and enemy soldiers will do nothing but salute him all the way. After your task is complete, a truck will come to pick you up north from your position. This is not an easy mission, officer. Only the perfect co-ordination of your men will ensure success. Be sure everyone knows his place. Thank you. That is all.

Trivia

- This mission features an enemy Bunker which is located near the dam.
- This mission contains two explosive weapons which can be obtained by the Sapper but you may use it only for the dam and the bunker.
- The Patrol Boat is shown in the mission briefing screen but it does not appear in the actual in-game mission.
